YAZEED AKRAM SALAHAT

Network Engineering and Security

Zarqa, Shomar | +962798296671 | yazeedhat@gmail.com | GitHub Profile | LinkedIn Profile

SUMMARY

Network Engineering and Security professional and Certified Red Team Professional (CRTP) with strong expertise in offensive security tactics and custom security tool development. Solid foundation in Active Directory exploitation, privilege escalation, and adversary tradecraft. Open to Red Team or Blue Team roles; actively building SOC/EDR fundamentals. Self-motivated learner with hands-on experience across Windows/Linux systems and security tools.

CERTIFICATIONS & PLATFORMS

- Certified Red Team Professional (CRTP)
- Red Teaming Pathways Certificate – TryHackMe
- Masar Cybersecurity Training Program (NCSC) – Comprehensive Red Team, Blue Team, and GRC Track

TECHNICAL SKILLS

- **Offensive & Web Security**: Active Directory security, Penetration Testing, OWASP Top 10 / Web Security, Privilege Escalation
- **Security Tools**: Mimikatz, BloodHound, Nmap, Wireshark, Metasploit, Burp Suite
- **Languages & Scripting**: Python (Security Automation), C++ (Systems/Tool Development), Bash, PowerShell, JavaScript
- **Defensive & Systems:** SIEM/EDR concepts, Splunk, Elastic Stack, Windows Server, Linux (Ubuntu/Kali), Firewalls

PROJECTS & HANDS-ON LABS

- **Custom Command & Control (C2) Framework | Personal Research & Development (In Progress)**
  - Built a zero-CRT C++ agent with a custom Memory namespace (Heap/Virtual allocation, configurable chunk sizing) — no standard library dependencies.
  - Architected a Python FastAPI C2 server (DDD clean architecture) with mTLS mutual authentication and async session management.
  - Designed a TLV-framed, AES-GCM encrypted protocol over HTTP/HTTPS with Base64Url transport via persistent WinHTTP sessions.
- **CTF & Adversarial Skills | HTB / TryHackMe / PortSwigger**
  - Hack The Box — Completed 10 machines across Linux/Windows (including Hard-rated: Axle, Intuition) and 10 web challenges via unguided exploitation.
  - PortSwigger Web Security Academy — Solved 116 labs covering OWASP Top 10 and beyond (SQLi, XSS, SSRF, XXE, Access Control, and more).
  - TryHackMe — Completed 151 rooms (Red Teaming Pathways Certificate) covering Active Directory, lateral movement, Splunk, and Elastic Stack.
- **"UniAssist" – AI-Integrated Management System | Graduation Project**
  - Developed a full-stack educational platform using FastAPI and Vue.js, featuring distinct portals for students and professors.
  - Architected LLM-driven agentic workflows (via Google Gemini) to automate intelligent academic advising and perform multi-phase exam grading using computer vision (OpenCV) and semantic evaluation.

EDUCATION

B.Sc. in Network Engineering and Security
Jordan University of Science and Technology | 2026
